

DJI AGRAS T100

SPRAY • SPREAD • LIFT

The DJI Agras T100 is DJI's biggest, most capable ag drone yet – built for operators who need serious capacity, speed, and coverage.

With a 26 gallon spray tank, 220 pound spreader, and 220 pound lift capacity, one aircraft sprays, spreads, and lifts.

LiDAR, millimeter-wave radar, and a quad vision system give 360° obstacle sensing, while 45 mph operating speed and 8 minute battery charging keep the T100 covering up to 55+ ac/hr.

**During field testing. Actual results will vary due to field conditions, application rate, firmware evolutions, etc.*

26 GALLON
SPRAY TANK

220 LB
SPREADER CAPACITY

45 MPH
MAX SPRAY SPEED

55+
ACRES PER HOUR*

50-500
MICRON SIZE

T100

- Large-acre row crop spraying and spreading
- High-rate cover crop seeding and dry fertilizer
- Heavy lift and hauling capacity in various conditions

HIGH CAPACITY PERFORMANCE

26 gal spray tank, 220 lb spreader, and 220 lb heavy-lift payload

Max spraying speed: 45 miles/hour with full obstacle avoidance and terrain following enabled

Spray flow rate: 7.9 gal/min standard, 10.6 gal/min with the 4-nozzle kit

Spread rate up to 880 lb/min

SMARTER TECHNOLOGY

Safety System 3.0: LiDAR, radar, and quad vision sense obstacles in every direction out to 200 ft

Terrain following with obstacle bypass on field edges

RTK positioning accurate to ±1 inch – lands in the same track every flight

PROVEN EFFICIENCY

62" carbon fiber propellers on a coaxial dual-rotor layout for powerful lift and stability in wind

Quick-lock spray, spread, and lift systems swap in minutes

41,000 mAh batteries recharge from 30% to 95% in 8 to 9 minutes

Sold, serviced, and supported by AeriAll in Minnesota

**During field testing. Actual results will vary due to field conditions, application rate, firmware evolutions, etc.*
